

Duke Biostatistics Core

A team of faculty and staff biostatisticians with diverse and extensive experience conducting a broad range of research projects.

- **Mission:**
 - To work with an interdisciplinary network of clinical investigators conducting research at Duke by providing expertise in study design, implementation of statistical methodology, and interpretation of results.
- **What we do:**
 - Provide expertise on all aspects of statistical design and analysis
 - Participate in protocol development and grant applications with design and analysis considerations
 - Collaborate with Duke Office of Clinical Research (DOCR) in database design and programming
 - Design and conduct statistical analysis for prospective and retrospective studies
 - Collaborate on manuscript and grant preparation
 - Provide statistical education and training
 - Work within the Clinical and Translational Science Institute (CTSI)
- **Start a collaboration:**
 - Submit a formal collaborative request through the website: <http://biostat.duke.edu/biostatistics-core>
 - Attend walk-in office hours, every Monday 9-10am at Hock Plaza room 11016
 - Contact your clinical research unit (CRU) manager or CRU biostatistician
 - For questions about building a statistical collaboration, contact Gina-Maria Pomann (gina-maria.pomann@duke.edu)

The Biostatistics Core is supported in part by the Duke Clinical and Translational Science Award (CTSA), National Center for Advancing Translational Sciences (NCATS) NIH Grant Award Number UL1TR001117.
